

8:00 | Arrival, Registration and Networking

Breakfast on arrival. Coffee, tea, and snacks available throughout the day.

8:30 | Introduction

Mark Hepsworth, CEO

Welcome and introduction to the day and insight into company goals and initiatives.

8:45 | Customer Experience

Simon Rayfield, Head of Client Services

Clients are at the forefront of our focus. We will share changes made to our support model internally, including the updates being implemented to our Case Management and Customer Portal applications to improve our support levels.

9:15 | Engineering Update

Igor Piroli, CTO

Through the implementation of our Heart Beat release management and process enhancements significant improvements have been made on release predictability and quality. This session will review where we are and our next steps.

9:35 | Release Management Process

Martijn Groot, VP Product Management

A review of our release management process and results from its implementation.

10:00 | Coffee break

10:20 | 2017 Product Strategy

Martijn Groot, VP Product Management

We'll review our 2017 product roadmap strategy and provide an overview of where we are, what's available and what's to come.

10:35 | Data Access

Hugo Boer, Senior Product Manager Server Software

The REST API allows users to access data through web services. It provides an easy way to access data and meta-data available in AC Plus. Data can be queried, created, updated and deleted through http requests.

11:05 | Data Distribution

Mohamed Boukari, Product Manager Middleware Applications

AC Connect is a flexible and efficient distribution module for delivering data stored in AC Plus to downstream systems and users.

11:35 | Pricing & Risk Data Management

Stephan Knauer, Senior Product Manager AC Risk Data Manager

Enabling full control over time series, AC Risk Data Manager provides support for a wide range of use cases in pricing and risk such as IPV and FRTB.

12:05 | Lunch Break

1:15 | Data Services Trends

Boyke Baboelal, Data Services Director

As data vendors' regulatory solutions roll out, a wave of data model changes are being made to support regulatory such as MiFID II. We will provide an overview of upcoming model changes, and discuss a list of roadmap candidates. We value your feedback as a crucial step in our decision-making process.

2:00 | Guest Speaker

Gerard Francis, Global Head Bloomberg Enterprise Solutions

Gerard is the Global Head of Bloomberg's Enterprise Solutions business, which provides data, technology and services to meet the enterprise needs of financial institutions. This division includes Pricing Data, Real Time Data, Technology Platforms, Data Feeds, Enterprise Data Management, (Bloomberg Polarlake) Compliance, eDiscovery and the Bloomberg App Portal.

2:45 | Customer Insight

Mark Fischer, Capital Group

Insight on how Capital Group is leveraging Asset Control to build an Enterprise wide Security Master.

3:30 | Introduction to AC User Group

Lee Whittier, State Street

Clients discuss key issues and enhancement needs as a group.

4:00 | Coffee break

4:15 | Next Generation Technology: ACX

Mark Hepsworth, Igor Piroli, Martijn Groot

We'll explain what's next in terms of ideas and plans and collect valuable client feedback.

5:15 | Closing Address and Thanks

Mark Hepsworth, CEO

5:30 | Cocktail Reception
